Adedokun Modesireoluwa

Frontend Developer & Graphic Designer

adedokunmodesireoluwa@gmail.com | Nigeria (Open to Remote jobs) | github.com/Dosky-05 | linkedin.com/in/modesireoluwa-adedokun-373b9b352

PROFILE

A software engineering student uniquely positioned at the intersection of design and engineering, able to translate visual concepts directly into polished, pixel-accurate interfaces without needing a handoff. Consistently self-directed in learning new technologies, having independently acquired skills in React, Node.js, Tailwind CSS and AI integrations outside of formal education.

Approaches problems methodically, breaking down complex requirements into clean, maintainable solutions with a strong eye for detail. Comfortable working in team environments and contributing to collaborative projects, with experience using Git-based workflows for version control and code collaboration.

Actively seeking opportunities to contribute to real-world products, grow within a professional engineering team, and make a measurable impact through well-crafted software.

SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Node.js (fundamentals)
Design: Adobe Photoshop, UI/UX Design, Graphic Design
CMS / Other: WordPress, Vite, Git & GitHub, Responsive Web Design

PROJECTS

StudyForge
study-forge-frontend.vercel.app — React.js, Tailwind CSS, Node.js + 4 more

- An AI-powered study assistant that generates personalized study plans, quizzes and summaries.
- Full-stack application integrating multiple APIs for intelligent content generation.
- Built for students to learn smarter with adaptive, AI-driven tools.

Cara Store
cara-store-pi.vercel.app — React.js, React Router, CSS

- Full-featured clothing brand e-commerce site with product pages and cart functionality.
- Multi-page layout with polished UI and smooth navigation using React Router.

Hibi Splash
hibi-splash.vercel.app — React.js, CSS, Vite

- Brand website for a Zobo beverage company with bold visuals and smooth UX.
- Focused on strong visual identity and engaging, responsive design.

EDUCATION

Software Engineering

Currently Studying — Babcock University (400lvl)

Focused on software engineering principles, web development and system design, supplemented by self-directed learning in frontend technologies and UI/UX design.

INTERESTS

Open-source development · UI/UX design · AI-powered applications · Brand identity design · Remote collaboration
